

Ammonium Molybdate

Substance Contain Soluble Molybdate for Foliar Spray

Contains:-

- A Molybdate Salt of Ammonia contains 52% of Molybdate(Mo).

Application:-

- Foliar Spray and Drip Irrigation in horticulture and Vegetable Crops

Benefits:-

- Plants also use molybdenum to convert inorganic phosphorus into organic forms in the plant.
- Molybdenum is an essential component in two enzymes that convert nitrate into nitrite (a toxic form of nitrogen) and then into ammonia before it is used to synthesize amino acids within the plant

Recommendation:-

- Useful in Vegetable, Flowers and Fruit crop at time of flowering and fruit settling stage.

Dose:-

- Foliar spray : 8 gm / 15 Liter Pump
- Drip Irrigation : 100 Gms / Acer.

Packing:- 100 Gram sachet packing.
