

Slick

Ortho Silicic Acid (OSA) 2.0%

Contains:-

- Contains Plant Available silicic Acid (OSA) as Si 2.0%

Application:-

- Ideal for foliar spray and drip fertigation.

Benefits:-

- Fulfill the hidden requirements of silicon in crop.
- Slick contains bio available silicon which helps plants to show an improved growth, higher yield, reduced mineral toxicity and better disease and insect resistance.
- Slick also helps alleviate Abiotic stress in the plant - temperature fluctuations, water shortage, excess rain and soil related stress (acidity, alkalinity, salinity, heavy metals etc.)
- Slick enhances greater uptake of nutrient available in soil so improves overall plant health and ultimately provide higher yield with superior quality.
- Inhibits salt (Sodium) absorption and improves photosynthesis in plants.

Recommendation:-

- Used in all crops much more beneficial for horticulture and cereal crops.

Dose:-

- For foliar spray - 1-2 ml /Liter
- For Drip irrigation - 500 ml /Acre

Packing:-

- 1 Liter, 500ml and 250ml Packing is available
